DETAILED ACTION

The following action is in response to application 10/755,368 filed on January 13, 2004.

Allowable Subject Matter

Claims 40-41 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record fails to show or render obvious the hydrostatic transaxle apparatus as claimed, and particularly including the axle, being axially viewed, wherein said rotary axis of the pump shaft and motor shaft are disposed nearer than an outer periphery of a gear centered on the axle, and including the remaining structure of claim 40. The present invention also particularly includes the pump and motor shafts being above and below one side of the axle, perpendicular to the axle, and the control arm and deceleration gear train are distributed between opposite sides of the axle with respect to the pump shaft in the longitudinal direction of the axle, and including the remaining structure of claim 41.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hayashi, Abend, Ito and Langenfeld have been cited to show similar transmissions.
